Tuberculosis (PPD) Test/TDAP Record

Employee's Name: _____

Site/Position: _____

Employee Signature: _____ Date: ____/____/____

The purpose of the PPD test is to detect past exposure to tuberculosis. There are no known contraindications to this test. Adverse reactions occur in those individuals who are reactive to the tuberculin organism.

This test is to be read in 48 to 72 hours. Indurations only should be considered in interpreting the test. The diameter of indurations should be measured transversely to the long axis of the forearm and recorded in millimeters.
