About Us

We are a family-oriented business, which means we understand the value of you and your family! Our journey began as adoptive parents of children with special needs. We understand the challenges families face regarding their children's futures and the confusion that may arise in navigating these systems. We have experienced the First Steps program as a family, greatly realizing the many benefits, and look forward to helping you achieve the same!

Hand in Hand has a large staff of experienced therapists who are passionate and skilled! In addition, we offer multiple services through our clinic to allow for additional options in your treatment approach.

Together We
Can Achieve
More!

We would feel honored to serve your family!
